Grocery Stores Now on DriverTech

With restaurants shutting down all over the country due to COVID-19, it's more important than ever for our drivers to be able to find a grocery store while they're on the road. To help out, our IT department updated the Amenity Stop Options on DriverTech to include grocery stores (under the "Food" selection).

Each grocery store shown will be within ¼ of a mile from a safe parking space – another amenity IT has been working hard on.

We're proud of our team for continuing to help our drivers get through this difficult time as safely and seamlessly as possible. Thanks to everyone who has worked on this update and to everyone else for their hard work and flexibility amongst all the uncertainty.
